## The Bassano Mail

Willis J. Smith  
editor and publisher  
Published every Thursday  
\$2.00 a year in Canada; \$1.00 in U.S.

Two American women established a new air endurance flight for women when they began a 15-day tour of the plains after 19 hours in the air. After more than 15 days in the clouds they just had to come down and do some shopping.

Governor Roosevelt insists on giving New York's Mayor Walker his walking stick.

Everyone seems to be satisfied with the results of the British-Bassano economic conference except the Americans.

## HUDSON BAY

Canada's new grain route via Port Churchill and Hudson's Bay is to be given a real test this summer. Already one ship has sailed from Churchill for France with a cargo of wheat, another is now being loaded, and others are on the way to Churchill.

After eight or nine months of intensive Churchill is again bustling with activity, and promoters of the Hudson Bay route are making a great effort to prove the route a commercial success.

The Hudson Bay route is open for navigation only three or four months in the year. This amount of grain must be handled in this short span of time if the huge cost of elevators and dock facilities are to be paid depreciation charges and interest on investment.

## WALSH COAL

It was not good news for Alberta coal operators and miners to learn this week that a trial shipment of Welsh anthracite had arrived in Manitoba for the Winnipeg trade. The Welsh coal, it is stated, will replace hard coal formerly imported from the United States.

Capture of Saskatchewan and Manitoba markets has long been the aim of Alberta coal operators, but so far their efforts have met with but little success. Great quantities of American coal have been used by the British in Manitoba, and now come from the United States.

It seems unreasonable that Alberta coal operators, situated only a few hundred miles from the Manitoba market, cannot successfully compete with American coal which has to be hauled great distances.

The situation probably will not be changed until the Alberta coal men make a united effort to convert the hard coal consumers of Winnipeg into soft coal users. A scientific research into the processing of Alberta coal into ice hard coal furnaces might bring favorable results.

## OVER ATLANTIC

One of the most daring feats of aviation was performed last week by Capt. James A. Molloy, a young Scotch aviator, who flew alone from Ireland to Canada, directly across the Atlantic ocean, in a single day.

At the first time the hazardous trip from west to east had been made by a lone flyer.

But record-breaking feats are becoming common for the largest Scot. Before making the Atlantic flight, Molloy had been in the air from England to South Africa, and from England to Australia. To him the trans-Atlantic flight was almost as good as done when he got his ship ready and started the journey. Now he plans to fly back.

Questioned as to his return trip, Molloy said, "It's easy compared with the east to west crossing; you can't miss it."

Such daring commands the highest admiration. The world is waiting to cheer Molloy again when he safely sets his plane down again after completing the return trip to England.

No Depression Here  
Madonald and his wife stopped in front of a restaurant window in which was hung a card bearing the words: "Lunches from 1 to 3 p.m. 40 cents."

"We'll have our dinner here, lassie," said Mac. "Two hours steady eating for 40 cents is no bad."

Wife: "Henry, do you know that you haven't kissed me for four nights?"  
Professor: "Good gracious, my dear! Then who on earth have I been kissing?"

The Alberta Pool Elevators represent the foremost step in the co-operative efforts of Alberta farmers. Every Alberta grain grower should see that this Alberta co-operative organization is assured the greatest possible measure of success.

## News of the Week

## BRITISH FLEET CHOOSES ALONE FROM IRELAND

TO CANADA FOR RECORD  
PENNINGLIDGE, New Brunswick, Aug. 25.—(Herald and Expositor.)—The fastest and driest of more than 30 hours at the controls of his flying boat, Capt. J. A. Molloy, brought his Puma Moth plane to a perfect landing here today, a quarter of an hour before noon, and ended with success the flight which only crossing the Atlantic by air.

Farmers and fishermen rescued from the little settlement, 40 miles down the Bay of Fundy coast in St. John, to where the plane landed half a mile from the tiny railway station. Molloy told them that the only reason he did not push on to his goal at New York was because he was too tired.

All through the night, the pilot said, he had flown through clouds and heavy mist. "The weather conditions were very unfavorable during the last 18 hours," he said. "He had been at the controls of the plane for 30 hours and 10 minutes sitting on a bare, unenclosed seat pushing his flying gasoline tank across about 2,700 miles of space from Ireland."

## MOLLOY PREPARING FOR RETURN FLIGHT

NEW YORK, Aug. 25.—Sandy-haired Capt. James A. Molloy, the only human to fly alone from Europe to the North American continent, is being held in an anxious state at the city over Manhattan's towering bulge and hoped that the weather man would let him start his long home to England in two or three days.

When he finished his pre-flight check, he flew from Europe, by flying from Saint John to New York, the husband of Amy Johnston, a famous movie star, said.

"Any and I have made a part to make no more extremely long or hazardous trips, once this flight is concluded."

In two or three days, given good weather, he will take off for Harbor Grace, where he will refuel and head for Crofton, England.

PROTECTED AGAINST  
DUMPS BY RUSSIA  
OTTAWA, Aug. 25.—Many new preferences are granted to Canada under her trade agreement with the United Kingdom. Numerous primary products of this country will be exempted from duties.

Others, such as lumber, at 10 per cent, remain at the old rates. Canned salmon and some other fish, likewise, will continue to enjoy the 18 per cent preference.

But the chief advantage that Canada has is that the former preference will be the protection against Russian dumping. The under-taking of the United Kingdom so to speak, in her market, the exports of this country is laid down in the trade agreement signed on Saturday.

SAYS FARM STRIKE IS SPREADING FAST  
SIOUX CITY, Iowa, Aug. 25.—As the farm strike entered its second week Monday, highway leading into Sioux City, Mayor W. O. Hayes in a statement Sunday urged a conference of governors to consider the situation.

"For the past week," said the statement, "Sioux City has been the centre of a movement that threatens to spread to the middle western states like a prairie fire. Here have occurred the first demonstrations in the so-called farmers holiday or strike against buying and selling."

"It is no exaggeration to say thousands of farmers and owners of property throughout the farming regions will be unable to pay taxes this year due to diminishing income."

In my opinion an emergency of first magnitude exists, one in which I detect a potential threat of serious consequences to the nation. Meanwhile pickets patrolled the seven state and federal highways into this terminal, barring truck shipments from Iowa, South Dakota, and Nebraska farms."

Of Bassano's "Pilgrim's Progress" only six perfect copies of the first edition are known to exist.

## DRUMHELLER MINERS STRIKE WAGE DISPUTE

DRUMHELLER, Aug. 26.—After negotiations extending over a period of three months, miners and owners in Drumheller Valley have reached an agreement whereby the wage scale contract which expired in the spring will continue to be in effect for a further twelve months.

All miners were represented at the conference with the exception of the A. B. C. Rosedale, and Star mines, which will be signed by representatives from these mines later in the day.

## GEOLOGIST PREDICTS SHORTAGE OF OIL

CALGARY, Aug. 25.—Stating that there was a shortage of 70 million barrels of oil last year, Dr. H. E. Elliott, well known American geologist, asserted that this condition faced a vast shortage of oil.

From 1920 to 1928, he said, 11,012,000 barrels of oil were produced, and 11,000,000 barrels were consumed. In 1929 production fell short by 25 million barrels. At the first of the year American stocks were sufficient for but nine months, being only 22,196,000 barrels, he said. The geologist said that 20,000 new wells must be drilled each year to maintain the supply, at least 10,000 last year.

## FRENCH SHIP RAIDS WITH WHEAT FROM CHURCHILL

CHURCHILL, Aug. 18.—While the holds of the British ship "Le Havre" were being filled with flour, rolled oats, and wheat at this new southern port, the French steamer "Sicrante" is plowing northward through the waters of Hudson Bay with a cargo of wheat bound for Le Havre.

The "Sicrante" was the first boat to arrive this season and the first to leave.

Her load of 230,000 bushels of No. 1 Northern wheat is consigned to L. Dreyfus, the French grain importer, and before leaving, Captain P. A. Mege indicated the Dreyfus company would likely send in more ships during the season.

## PRICE STATE IN DISSENT TO BRITAIN

DROGHEDA, Irish Free State, Aug. 25.—I pledge myself Britain will not get her money until she gives her right to it. In these words President Eamon de Valera of the Irish Free State, Sunday morning, declared the payment of land annuities under the financial agreement of 1923 and 1926 with the United Kingdom.

"We have our money into a suspense account and it is there for all the world to see," declared the president. "The money would stay there until fair negotiations for settlement were initiated," he said, "and it was safe for the country's credit was behind it."

"There is not in our minds any animosity against the British as such," said Mr. de Valera. "If any other people in the world attempted to dominate us as the British Crown did in the past we would have fought them too."

Tale and soapstone are similar minerals, the former mined near Madoc, Ontario, while Canadian production of soapstone comes from Quebec.

For the past week, said the statement, "Sioux City has been the centre of a movement that threatens to spread to the middle western states like a prairie fire. Here have occurred the first demonstrations in the so-called farmers holiday or strike against buying and selling."

"It is no exaggeration to say thousands of farmers and owners of property throughout the farming regions will be unable to pay taxes this year due to diminishing income."

In my opinion an emergency of first magnitude exists, one in which I detect a potential threat of serious consequences to the nation. Meanwhile pickets patrolled the seven state and federal highways into this terminal, barring truck shipments from Iowa, South Dakota, and Nebraska farms."

Of Bassano's "Pilgrim's Progress" only six perfect copies of the first edition are known to exist.

SMOOTH tires and slippery roads are a dangerous combination. The difference between safety and danger is too slim to risk a slide or not being able to stop.

Don't risk your life. . . . replace your smooth tires with Firestones High Speed Tires. Enjoy the extra strength, extra safety and extra service of Gum-Dipping, Two-Extra Cord Piles Under The Tread and the tough, thick tread—which make Firestone tires the safest tires in the world.

Drive in today and let us put a new set of Firestones on your car.

## LIFTING OF CATTLE BAY IS ANTICIPATED

CALGARY, Aug. 25.—Shippers of cattle from the Calgary district to the United Kingdom were jubilant today when they learned that under the agreement between Canada and Britain, restrictions pertaining to the lifting of a ban on Canadian cattle, are to be lifted.

"It will create a much broader market for Canadian cattle in Britain," J. B. Cross, one of the largest cattle shippers, stated. "Under the former regulations the restrictions were such as to make people in Britain reluctant to buy Canadian cattle. All that will be required in the future is for Canadian cattle to pass the health regulations. The delivery of cattle shipments will be able to sell the cattle at once instead of having to hold them for many days."

## BASSANO MARKET GARDEN

Two miles east of town on the main highway  
TOMATOES, 10c a lb

Also Willis player Piano with about 80 records on easy terms to responsible party. A. M. Anderson, Cochrane.

## LOCAL NOTES

## ON GOLD DISCOVERY

**PORT HALL, N. W. T., Aug. 26**—Discovery of what may prove to be a new and rich gold field has been made in the Caribou Islands in the east end of Great Slave Lake. And, to the credit of the discovery, it is in the hands of adversity, is indirectly responsible for the find.

On May 1, Jack MacKenzie, veteran prospector and miner, Jack Guard, of The Pas, the Canadian brother of Detroit, and Morris and Wagon, accompanied by P. J. Peet and Ed. Hargreaves, had spent several days out on one of the islands of the Caribou group, when one of the old seafarers chanced upon the discovery in a bay or inlet. Claims were staked and, although the prospects are very remote, it is known that the vein is several feet in width, that it has length, and that the indications point to a rich strike. The location is known to be within a few miles of the old Aurora mine.

## LOCAL NOTES

Mrs. A. A. MacGregor was a visitor to Calgary this week. Mrs. Jas. Johnston and Miss Jean Johnston were visitors to Calgary early this week.

Mr. and Mrs. Brown, of Patricia, and Paul Ward, of Brooks, were in Banana last Sunday for afternoon of tennis.

Donald MacGregor has joined the teaching staff of Banana school. Jim McDonald went to Calgary early this week to visit with friends.

Mr. and Mrs. A. McKee and daughter Margaret, and Miss MacCallum, returned to Medicine Hat last Sunday. Mr. McKee is a resident of Calgary.

Dr. W. G. Anderson, of Wardlaw, was a caller in town last Thursday.

Big baseball game at the Banana ball park next Sunday at 3 p.m. The Mercantile will play the irrigation All-Stars in a return game.

Mrs. E. Hinde, who has been at Stewartville, Minnesota, for some months past, has returned to Banana, and is now visiting friends in town.

Miss E. McCarthy returned last Sunday after spending a month's vacation at Inverness.

A government airplane, C.P. A.M.W., was in town last Monday and Tuesday.

Annual flower service at Knox Church next Sunday morning at 11 o'clock.

## BIRTHS

The following births have recently been recorded at the Banana Hospital:

A son, to Mr. and Mrs. J. B. Wallace, of Gern, on Aug. 25.

A daughter, to Mr. and Mrs. W. J. Kennedy, of Minn, on Aug. 15.

A daughter, to Mr. and Mrs. C. Krause, of Rosemary, on Aug. 25.

A son, to Mr. and Mrs. T. Black, of Crowfoot, on Aug. 25.

A daughter, to Mr. and Mrs. C. Raynor, of Duchen, on Aug. 21.

A daughter, to Mr. and Mrs. Marshall, of Hissar, on Aug. 25.

**DOUBLE PROGRAM AT THE ORPHEUM**

A special attraction in the form of a double program is billed for the Orpheum Theatre Thursday, Friday, and Saturday, of this week, Aug. 25, 26, and 27.

Two complete picture programs will be shown on these three nights for the regular admission price, or one show. Theatre-goers will thus see two shows for the price of one.

The pictures showing on these three nights are "Riders of the Purple Sage," a famous Zane Grey story, and "First To Fight."

That perfect combination of romance and thrilling action, "Riders of the Purple Sage," which is showing at the Orpheum theatre Thursday, Friday and Saturday of this week, Aug. 25, 26, and 27.

Fox Films has made this famous Zane Grey subject one of those infrequent so-called "program pictures" that emerges from the studio as a real epic achievement, a perfect harmony of cast, story, setting, and direction that results in a picture to be talked about and remembered.

George O'Brien, in the role of Lantier, the heroic stranger, has the finest role of his career; Marguerite Churchill is beautiful and convincing as Jane Whitewater, owner of the historic ranch that Lantier saves from the depredations of Noah Berry, who plays a villain who acts to his, Stanley Fields and Frank McElroy, Jr., and their organized henchmen. Others who work that is more than creditable are James Todd, Yvonne Pelletier, and Little Shirley Nalls, a real screen "find" of three years ago.

The story is one of the best that ever galloped from the prolific pen of Zane Grey. O'Brien, in the role of the chapparral, looking for a sister, who has strayed away from home many years past, comes to the ranch of Marguerite Churchill, whose grazing lands and herds of cattle are coveted by Noah Berry, a venal judge and corrupt head of a Law and Order Society. O'Brien pursues Berry's underlings, when they ratle Miss Churchill's cattle, to a secret valley whose entrance is through a waterfall, and comes on traces of his lost sister. When he learns she is dead he recovers her two children and panache. Berry is a very exciting sequence. Then he escapes with Miss Churchill and baffles the pursuit of the Berry faction in a manner so thrilling to spot by revealing.

"First To Fight" is a ripping, rollicking comedy starring Blum Merville. This feature, a complete show in itself, is an additional attraction to the program. You'll laugh till it hurts at the scrapes and antics of Blum.

"Wayward," starring Nancy Carroll, Richard Arlen, and Fredrick, is coming next week, Thursday, Friday, and Saturday, Sept. 1, 2, and 3. When the rules of society clash with the dictates of "Yes," rings loudest to a boy forbidden marriage, and a girl who found the happy answer to her rain-bow dream of romance? Come and see in "Wayward."

**KNOX PRESBYTERIAN CHURCH**  
Rev. P. C. McCrae, Minister  
"The Church Where the World Finds a Home."

Sunday, August 28, 1932.  
Flower Sunday.

11 a.m.—Service of the Flowers.  
A unique service for young and old. Everybody welcome.
